

Clinical research under better conditions – We combine academic knowledge and medical expertise with economic flexibility.

**GBG Forschungs GmbH** is an independent, impartial academic research organization (ARO) that develops, conducts and evaluates clinical study projects to improve therapeutic options for breast cancer patients. Our cooperation partners include companies and organizations from science, research and industry. The company is located in Neu-Isenburg and currently employs about 130 people.

**GBG Forschungs GmbH** offers you a high level of identification with scientific and study projects. In addition, you will benefit from an exciting and varied field of activity with attractive development options.

To strengthen our team in the area of Medical Writing / Scientific Communication in the Medicine & Research department, we are immediately looking for a

## Medical Writer / Scientific Advisor (m/f/d)

### Your essential tasks

- Writing scientific contributions for leading international congresses (presentations, posters and abstracts) and high-level journal submissions with global reach reporting on clinical trials and translational research projects in close collaboration with the departments of statistics / bioinformatics and medicine, as well as external national and international co-authors
- Coordinating internal and external communication for the content alignment of the contributions, as well as coordinating the technical publication processes and submissions of manuscripts and abstracts
- Collaborating in scientific projects including the possibility to design and perform analyses of clinical and translational data yourself
- Preparation of clinical study reports in close cooperation with the departments of statistics and medicine
- Participating in the creation of study protocols in the projecting phase of new clinical trials

### Your profile

- You have successfully completed a scientific or medical degree (MD / PhD / MA / MSc / BA / BSc) in the field of medicine or life sciences
- You can demonstrate experience in scientific work and dealing with medical or scientific publications
- You have medical / scientific expertise in the field of oncology (ideally in gynecological oncology)
- You like to work independently in a young and dynamic team
- You possess the following skills: strong communication skills, analytical approach and thinking skills, as well as good time and organizational management skills
- You are confident in using MS Office applications, literature reference management software, and graphics tools
- You ideally have experience with SPSS, R or SAS (desirable)
- You have native or near native proficiency in German and English, both written and spoken

### What we offer

- Participation in exciting, clinical trials and translational research projects with global reach
- An international working environment with regular exchange with other internationally active study groups
- 30 days of vacation and additionally 24. and 31. December off
- Work-life balance: trust-based working hours, flexible working hours, option for partial remote working
- Further development: internal and external trainings
- Further Benefits (e.g. Job-Bike, parking, grant for public transportation "Deutschland-Ticket")

### Have we aroused your interest?

An employment in a dynamic company with short decision-making processes in a motivated team is available. Innovation and commitment characterize our cooperation.

We look forward to receiving your detailed application, stating your salary expectations and the earliest possible starting date:
